Response Regarding Proposal R406.2 Carbon Emission Equalization

We are against this proposal for the following reason.

Remove R406.2 because this approach does not meet the intent, and is the opposite, of RCW19.27A.210 in notes 1 through 5 and it would not be cost effective for power. The utility companies know what this would cost, and they are saying this is not the correct approach. My response to R405.3 also applies here.

Edwin "Larry" Andrews II
