Subject: FW: Washington ICC tall wood comments

Richard, thank you.

Attached is the original comment letter and NAFM comment letter. Below is the original email message to WA state voting delegates and the IAFM link to their comments. Both letters have links embedded in the comments letter.

It is my understanding this would be for the tall wood proposals for the 2021 ICC code with voting anticipated on November 15. We would respectfully WA ask state delegates to Vote NO on amendments; G75-18, G108-18, and G84-18, especially G108-18

If these comments are also relevant to WA state efforts with regard to any current efforts underway to amend SBCC per SB 5450, as you reference 2015 IBC and IFC and 2018 IBC and IFC, please utilize these comments as well. if there is a formal process currently underway regarding 5450, could you please help clarify what the process is and timeline.

Thanks very much.
