Subject: Codes that reduce carbon emissions

Greetings:

Thank you for implementing energy codes which will result reduce carbon emissions and maximize the use of clean electricity. I am a science teacher. It has been clear for 40 years that an economy based on fossil fuels cannot last, and will wreak havoc on our civilization. The time is over for decision makers to give credence to the misinformation of the fossil fuel industries. With the scientific community warning that we have waited far too long, now your help in facilitating a transition to clean energy is absolutely essential to our future.

Thank you,
Louise Stonington
