Hi Micah,

I support your friendly amendment. Please see below for an updated version of the public comment.

Thanks,

Lee

Thanks Lee.

I do like your recommended change to the used wood proposal, but I think you should leave out approved before grade mark, since grade mark is what is used throughout the code. Also mark is an actual defined term.

So if you are open to that further modification? Let me know.

Micah

CAUTION: External Email

Hi Richard,

I don't have a problem with the concept of the proposed language but in R602.1.1.1 there should be mention of the need for a grade stamp (i.e. "Used sawn lumber identified with a approved grade mark, in good condition and devoid of areas of decay shall be assumed to meet the requirements of Section 602.1.1 or shall comply with the following:". And then in item #1 of 602.1.1.1 it could say "Dimensional lumber not identified with a approved grade mark that has a nominal thickness of 2-inches....". As written, the language is confusing because R602.1.1.1 bypasses the need for a grade mark making any non-graded lumber to be in compliance with R602.1.1 (not good).

I also would like to go on the record as being opposed to the shaft pressurization code change.

I'll be on the road tomorrow so I won't be able to attend the SBCC meeting but would appreciate it if you could share my thoughts on this code change with the Council.

Thanks,

Subject: FW: Salvaged Lumber State Code Proposal - Open for Comments

Hi all,

I've been working with a group of folks in King County attempting to reduce the amount of construction and demolition waste that ends up in landfills. Deconstruction would allow some of the quality wood materials that exist in homes to be re-used. This amendment to State Building Code resembles a code amendment that was established in Oregon. Every length of reused lumber means less waste in the landfill and more trees absorbing stormwater, providing habitat and foraging opportunities, sequestering carbon and producing oxygen.

If you're so inclined, please drop the State Residential Building Code Council a line and let them know your thoughts on the matter.

Thank you,
Carol L. Orr

Subject: Salvaged Lumber State Code Proposal - Open for Comments

Hi Everyone,

The salvaged lumber code change proposal which was submitted to the WA State Residential Building Code Council is open for written testimony (**until September 27th**) and for public comment at a **code hearing meeting in Olympia on September 27th**. Details can be found here (<https://apps.des.wa.gov/SBCC/Page.aspx?cid=943>).

We encourage you to provide comments on the proposal, if you feel so inclined.

The salvaged lumber proposal falls under the IRC section of the meeting agenda and it can be seen as "Used Sawn Lumber" proposal #67 under the 2018 IRC Proposed amendments. The code has also often been referred to as proposal 19-IRC32. To avoid confusion, **the proposal should be referred to in any correspondence with the Building Code Council as “new Section R602.1.1.1 Used sawn lumber”**.

The full language of the proposed code change has been attached to this e-mail. If you have any questions, please contact Kathleen Petrie (cc'd) or myself.

Thanks! - Kinley
