Title: Technical Code Development Manager, Seattle Department of Construction and Inspections

Address: 700 Fifth Ave. Suite 2100, Seattle, WA. 98104

Mail: PO Box 34019, Seattle, WA. 98124-4019

Office Phone: (206-256-5157)

Cell: (206-305-4362)

E-Mail address: micah.chappell@seattle.gov

4. Proposed Code Amendment.

Code(s) IBC Section(s) 1110.2

Amend section to read as follows:

1110.2 Toilet and bathing facilities. Each toilet room and bathing room shall be accessible. Where a floor level is not required to be connected by an accessible route, the only toilet rooms or bathing rooms provided within the facility shall not be located on the inaccessible floor. Except as provided for in Sections 1110.2.4 and 1110.2.5, at least one of each type of fixture, element, control or dispenser in each accessible toilet room and bathing room shall be accessible.

Exceptions:

1. Toilet rooms or bathing rooms accessed only through a private office, not for common or public use and intended for use by a single occupant, shall be permitted to comply with the specific exceptions in ICC A117.1.
2. This section is not applicable to toilet and bathing rooms that serve dwelling units or sleeping units that are not required to be accessible by Section 1108.
3. Where multiple single-user toilet rooms or bathing rooms are clustered at a single location, at least 50 percent but not less than one room for each use at each cluster shall be accessible. Where rooms are designated as gender-neutral, the total number of accessible fixtures shall not be less than the total number of accessible fixtures for separate male and female rooms.

5. Briefly explain your proposed amendment, including the purpose, benefits and problems addressed.

This proposal will modify the Washington amendment to further clarify what accessible fixtures the gender-neutral accessible fixtures shall be equivalent to.

The current Washington amendment language and this further modification will ensure that the number of accessible toilet or bathing fixtures is not reduced when the required toilet and bathing facilities are designed and constructed as gender-neutral. The current language of this section states that multiple single-user facilities in a cluster only requires 50 percent, but not less than one for each use, of the facilities be accessible. This would allow for an interpretation that a gender-neutral facility would not have to provide the same number of accessible facilities as separate gender facilities. The overall number of accessible facilities provided for males and females must be maintained when using gender-neutral facilities. The inclusion of gender-neutral facilities was not intended to reduce accessibility or the number of toilet and bathing fixtures.

6. Specify what criteria this proposal meets. You may select more than one.

- The amendment is needed to address a critical life/safety need.
- The amendment clarifies the intent or application of the code.
- The amendment is needed to address a specific state policy or statute.
- The amendment is needed for consistency with state or federal regulations.
- The amendment is needed to address a unique character of the state.
- The amendment corrects errors and omissions.

7. Is there an economic impact: Yes No

Explain:

This proposal will not increase or decrease the cost of construction. This proposal further clarifies that the same number of accessible facilities be provided when separate sex or gender-neutral facilities are constructed.
