Subject: Oppose energy code proposals 21-GP-1-103, 21GP1-136 and 21-GP1-179

External Email

I am asking The State Building Code Council to;
Oppose energy code proposals 21-GP-1-103, 21GP1-136 and 21-GP1-179 whereas these proposals will inhibit the ability in providing the consumers appropriate energy sources. And in many regional areas of Washington State, life-safety energy sources that will be required without reliance on an overloaded electric grid system in times of dire heating and cooling seasons
