Washington State Capitol Building  
1500 Jefferson St SE  
Olympia, WA 98501

To The State Building Code Council,

I oppose energy code proposals 21-GP-1-103, 21GP1-136 and 21-GP1-179 whereas these proposals will inhibit the ability in providing the consumers appropriate energy sources. And in many regional areas of Washington State, life-safety energy sources that will be required without reliance on an overloaded electric grid system in times of dire heating and cooling seasons.

Sincerely,

A handwritten signature in black ink, appearing to read "Dustin Dawson". The signature is fluid and cursive, extending across the width of the page.
