Subject: Opposing - commercial energy code proposals 21-GP1-103, 21-GP1-136 and 21-GP1-179

External Email

Members of the Washington State Building Codes Council:

I oppose the commercial energy code proposals 21-GP1-103, 21-GP1-136 and 21-GP1-179.

Not only do these proposals limit individuals ability to choose the energy source that best meets their needs, they will definitely increase costs which will be passed on to consumers. This also forces people to rely entirely on the electric system. We have all seen what happens in California when the electrical grid cannot support demand.

More importantly, these proposals will have almost no impact on the state's emissions, which is the fundamental rationale behind them.

Thank you for your consideration
