Subject: About Natyral Gas

External Email

Dear sir,

Please I suggest natural gas should be the basic source of energy. I humbly oppose the motion the ban of Natural gas because it is cheaper and clean.

Electric heaters are very expensive for the average population both for residential and commercial.

Secondly the United States us has Natural Gas in abundance for energy independence that is boosting the economy. Please do NOT BANNED NATURAL GAS.

Thank you for your understanding.

Sincerely,
Gideon Lord-Adem
