Subject: Proposal opposition

External Email

I would like to state my opposition to Proposals 21-GP1-103, 21-GP1-136, 21-GP1-179. Banning the use of fossil fuels in heat pumps and hot water heaters in commercial applications contributes to limited resources for businesses. Also the requirement of an electrical outlet near NG appliance installations would increase costs of installation of commercial equipment.

Best regards,

Deborah Hannig
