**Subject:** Commercial Building Code Update

External Email

Dear SBCC,

I'm writing to ask you to support a commercial building code that requires new commercial construction to use clean electric-powered technology for space and water heating. Reducing the amount of carbon we burn is crucial to slowing the rise in global temperature. I want Washington to lead the way with a strong model code. We have the technology, we can do this. We have no time to waste.

Thank you.

Sincerely,

Iris Antman
