

Motion:

I make a motion that the SBCC move the group 1 code change proposals, as presented, towards CR-102. Staff is directed to prepare the CR-102 for the July 18, 2025, SBCC meeting for final approval and publication. In addition, the Standing Committees, BFRW and MVPE, are directed to coordinate and manage;

1. Proposals that require correlation be sent to the correlation committee, and that committee directs proper correlation and sends the final product back to the Standing Committees for consideration.
2. Proposals that need additional small business and/or economic impact statements prepared are to be sent to the Work Group on Economic Impact, and that committee directs and prepares any additional economic impact statements required and sends the final product back to the Standing Committees for consideration.
3. Proposals where there is additional editorial clean up and/or public input requests are received, the Standing Committees shall meet to allow for this additional public input/work. If a Standing Committee contemplates making a substantial variance from the filed rule after public input, the Standing Committee will follow RCW 34.05.340 in determination of 'substantially different' and potential need for refiling and additional public process including public comment and possible advisement from the TAGs.

All proposals are to be returned to the Standing Committees by July 11, 2025 for final review and approval by the Standing Committees by July 18, 2025.

**Commented [DC1]:** Red Dates align with the proposed schedule
